# SARA A. N. NEDERSKOV

Human-focused Fullstack Developer integrating expertise in React, JavaScript/Typescript, Java, and modern architectures with psychological insight to enhance user experience and drive business impact.

## Professional skills

- Programming
- Communication
- Agile methodologies
- Documentation
- Code review
- Interdisciplinary collaboration
- Project management

## Personal skills

- Adaptable
- Teamplayer
- Quick learner
- Responsible
- Great communicator
- Open minded
- Independent

## Technical skills

- JavaScript/Typescript
- React.js/Next.js
- Design systems
- Java
- AI
- UI/UX
- GIT
- CI/CD
- REST API
- Docker
- Dataservices and -integration
- Automated tests

## Languages

- Danish (Native)
- English (Fluent)
- German (Basic)

## Profile

My strength is bridging code and human understanding. That means I understand the person using our technology, the designers behind it and the developers I build it with. This shows itselft in my dedication to writing clean and maintainable code and being technically curious.

## Work Experience

**Software Developer**                                      2022 - Present
Danske Spil

- Contributed to the launch of the new danskespil.dk with a modern Next.js architecture, working closely with UX designers and business stakeholders.
- Introduced TypeScript and TailwindCSS, reducing development time and complexity while modernising our tech stack.
- Learned Java from scratch and developed new data integrations in Spring Boot, replacing older systems to improve stability and reduce costs.
- Drove the implementation of AI tools such as GitHub Copilot and AI assistant, increasing development speed.

**Project employee**                                      2019
Lejre Kommune (Lejre Municipality)

- Facilitation and coordination of the project "Dronten – Lejre Børnekultur", creating an engaging and fun learning environment.
- Upkeep of the webpage www.dronten.dk, sparking my interest in programming.
- Writing press releases to showcase the positive impact of "Dronten – Lejre Børnekultur" and secure fonds from the local council.

## Education and courses

**DevOps Tools** - **Docker & Kubernetes for Developers**      2023
IDA Learning

- Fundamentals of Kubernetes, container security, and building containers from images, including creating Docker containers.
- Using Docker for sandboxing and testing, managing data with Docker volumes, and orchestrating containers with Docker Compose.

**Webdevelopment**                                      2020-2022
Roskilde Technical College

- Advanced programming using HTML, CSS og JavaScript
- Component based frameworks such as React.js og Next.js
- Use of SCSS, Styled Components, Emotion, Tailwind and Bootstrap

**Masters in Social Science and Psychology (MSc)**      2015-2018
Roskilde University

- Skills include problemsolving, interdisciplinary coorporation, communication, and developing and leading projects
