Profile

I'm a frontend developer by trade who is passionate about crafting intuitive, user-focused digital experiences. I combine technical expertise in React, JavaScript, and modern web technologies with a background in social sciences and psychology, bridging code and human understanding.

Work Experience

Software Developer   2022 - Present
Danske Spil

- Developed Danske Spil's new homepage www.danskespil.dk in collaboration with designers and stakeholders. This project introduced Next.js and Tailwind to the tech stack.
- Independently learned Java from scratch in order to help develop and maintain Danske Spil's dataintegration services. This lead to replacing old services and databases with new Spring Boot services to ensure longterm stability and make significant cuts to bussiness expenses.
- Testing and integration of new AI tools into everyday development, eg. ChatGPT, Github Copilot and AI Assistant, making our workflow faster.

Project employee   2019
Lejre Kommune (Lejre Municipality)

- Facilitation and coordination of the project "Dronten – Lejre Børnekultur", creating an engaging and fun learning environment.
- Upkeep of the webpage www.dronten.dk, sparking my interest in programming.
- Writing press releases to showcase the positive impact of "Dronten – Lejre Børnekultur" and secure fonds from the local council.

Lay judge   2015-2019
Retten i Holbæk (Holbæk Court)

- Assisting the judge in decision making regarding criminal cases ensuring justice for victims and fair judgement for perpetradors.

Education

Webdevelopment   2020-2022
Roskilde Technical College

- Advanced programming using HTML, CSS og JavaScript
- Component based frameworks such as React.js og Next.js
- Extensive knowledge of React hooks and state management
- Use of SCSS, Styled Components, Emotion, Tailwind and Bootstrap

Masters in Social Science and Psychology (MSc)   2015-2018
Roskilde University

- Skills include problemsolving, interdisciplinary coorporation, communication, and developing and leading projects
